

Food Nutrition Testing Services

Your Nutritional Panel Guide

NATA Accredited for Chemistry, Microbiological and Residue Testing

Consumers are requesting more detailed information about the food they are buying and food regulators are continuously updating the nutritional information required on food product labels.

Symbio Laboratories has the capability to provide a broad range of tests to assist clients to better describe the nutritional aspects of their products.

Food Nutrition Testing Capability

- Standard Nutrition Panel comprising of Fat, Protein, Carbohydrate, Ash, Sodium, Moisture and Fat Profile (Mono, Poly, Sat, Trans)
- Standard Nutrition Panel plus Dietary Fibre
- Specialist and customised nutritional panels for supermarket and export requirements.
